Installation finished.
Do you wish to update your shell profile to automatically initialize conda?
This will activate conda on startup and change the command prompt when activated.
If you'd prefer that conda's base environment not be activated on startup,
run the following command when conda is activated:
conda config --set auto_activate_base false
Note: You can undo this later by running `conda init --reverse $SHELL`
Proceed with initialization? [yes|no]
[no] >>> yes
